systems studied in environmental science due to their structure and the heterogeneity of the entities composing them often exhibit complex dynamics that can only be captured by hybrid modeling approaches while several concurrent definitions of hybrid modeling can be found in the literature it is defined here broadly as the approach

consisting in coupling existing modelling paradigms to achieve a more accurate or efficient representation of systems the need for hybrid models generally arises from the necessity to overcome the limitation of a single modeling technique in terms of structural flexibility capabilities or computational efficiency this book brings together experts in the field of hybrid modelling to demonstrate how this approach can address the challenge of representing the complexity of natural systems chapters cover applied examples as well as modeling methodology
